DESCRIPTORS	College Majors; *Enrollment Rate; *Enrollment Trends; Females; Higher Education; Males; *Post Secondary Education; Private Colleges; State Colleges; State Universities; *Statistical Data; *Surveys

ABSTRACT

Presented are data on enrollments in institutions of higher education for fall 1974. Data are broken down by: 2-year and 4-year colleges and universities; public and private institutions; part-time and full-time students; males or females; type of program; level of enrollment; and state or other regional area. Fall enrollments for 1974 are found to increase by 6.5 percent over fall 1973. Appendices cover survey background information regarding the survey population, "traditional" and "alternative" classification methods of aggregating institutional units, and questionnaire editing procedures; and reproduce the survey questionnaire and the survey instructions and definitions. (KE)

Documents acquired by ERIC include many informal unpublished materials not available from other sources. ERIC makes every effort to obtain the best copy available. Nevertheless, items of marginal reproducibility are often encountered and this affects the quality of the microfiche and hardcopy reproductions ERIC makes available via the ERIC Document Reproduction Service (EDRS). EDRS is not responsible for the quality of the original document. Reproductions supplied by EDRS are the best that can be made from the original.

NATIONAL CENTER FOR EDUCATION STATISTICS

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

FOREWORD

The questionnaire used to obtain data on enrollments in institutions of higher education for fall 1974 was exactly the same as that used for fall 1973. Therefore, the tabulations contained in this report are comparable except for the addition of one set of tables (9, 17, and 25).

In the interest of making available the complete results of the survey as soon as possible, computer-generated tabulations only are presented in this report. A separate report to be published later will include descriptions of selected tabulations of data contained herein, as well as simple analyses and illustrations to amplify significant statistics and their relationships.

The continuing cooperation of the registrars and other college and university officials who supplied the basic data is deeply appreciated.

Edith M. Huddleston, Acting Chief
Higher Education Surveys Branch

Theodore H. Drews, Acting Director
Division of Survey Planning and Analysis

INTRODUCTION

Fall enrollment in institutions of higher education in 1974 increased by 6.5 percent over fall 1973, the second consecutive year of increasing growth since the low point of fall 1972, when enrollment had increased by only 3.0 percent over fall 1971. (See table 1.)

As usual, public institutions experienced a greater rate of growth (7.6 percent) than private (2.5 percent). Enrollment at publicly controlled colleges and universities constituted 78.0 percent of the aggregate U. S. total in fall 1974.

Also in keeping with a longstanding trend, the enrollment of female students increased at a considerably faster pace (8.7 percent) than that of male students (4.7 percent). Women accounted for 45.1 percent of all enrollments at institutions of higher education in fall 1974.

The enrollment of first-time entering freshmen increased at a slightly lesser rate (6.4 percent) than overall enrollment from fall 1973 to fall 1974. Again, public institutions showed a considerably higher rate of gain (7.4 percent) than private institutions (2.2 percent). Also, female freshmen outgained male freshmen (7.7 percent versus 5.3 percent), although the difference was not so great as for total enrollment.

See appendix A for survey background information regarding the survey population, "traditional" and "alternate" classification methods of aggregating institutional units, and questionnaire editing procedures. See also appendix B for a reproduction of the survey questionnaire, with summary data superimposed, and the survey instructions and definitions.

1/ Readers should be reminded that although enrollment does change every year, so does the number of institutions accounting for this total enrollment. Accordingly, the numbers of institutions in each year for which enrollment data are shown in the table are as follows: 1974 - 2,763; 1973 - 2,736; 1972 - 2,680; 1971 - 2,617; 1970 - 2,565; 1969 - 2,536; 1968 - 2,495; 1967 - 2,382; 1966 - 2,337; 1965 - 2,238; 1964 - 2,183.

2/ A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "total, all students" counts. Data for first-time students for years prior to 1966 are not comparable since they include only first-time students in programs chiefly creditable toward a bachelor's degree.
